

## INDUSTRY & CAR REFINISHING DIVISION - PRODUCT SHELF LIFE

the chemical characteristics, including colour, of our products remain stable for the duration shown in the table if the following storage conditions are maintained:

**Water-based products from + 5°C to + 35°C - Solvent-based products from 0°C to + 35°C**

In any case, it is recommended to consult the Technical Data Sheets, available on our website: [www.vernicicaldart.it](http://www.vernicicaldart.it).

The "shelf life" is valid only for products in the price list (ready in stock).  
For the remaining products (NOT in stock), see the reference technical data sheet.
