## ADHESION PROMOTER ADDITIVE

### NATURE OF PRODUCT:

Mixture of solvents and additives.

### FIELD OF APPLICATION:

Adhesion promoter, active on both metal and glass surfaces.

Recommended to improve the adhesion degree of two-component acrylic enamels and/or paints (700 series with direct adhesion) and two-component epoxies. It can also be used on oven paints, such as our 800 series.

### METHODS OF USE:

Add 2% - 3% by weight to the paint or enamel (component A) and mix possibly with the stirrer.

### SAFETY REGULATIONS:

Strictly follow the instructions on the labeling and in the safety data sheet.

### STORAGE CONDITIONS:

The storage room must be dry and with a temperature between +5 °C and +30 °C.
